# Welcome Shannon!

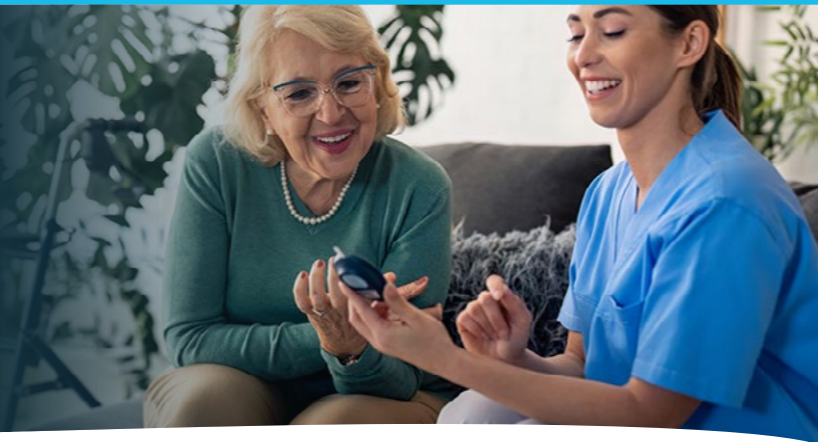

SSS Australia would like to welcome Shannon Jennings to our strong team of Personal Account Managers! Shannon is servicing our customers in Brisbane South, Ipswich, Toowoomba, and South Australia.

Shannon has extensive working knowledge across many product categories, specialising in optical and nutrition. She has spent a lot of time educating in ICUs about oral nutritional supplements. Please make Shannon feel welcome.

## Chronic Wounds Consumables Scheme

Diabetes is the fastest growing chronic condition in Australia with almost 2 million people living with the condition<sup>1</sup>. Diabetes is one of the 10 leading causes of death<sup>1</sup>. The prevalence of diabetes, rates of hospitalisation, mortality and burden of disease are greatest among First Nations people, those living in lower socioeconomic areas and people living in remote and very remote areas of Australia<sup>2</sup>.

Up to 75% of amputations in people with diabetes are the direct result of diabetes-related foot disease<sup>3</sup>. Diabetes related foot disease is defined as ulceration, infection, ischaemia or neuroarthropathy of the foot in people with diabetes<sup>4</sup>. Those most at risk are persons with diabetes and who have developed peripheral neuropathy, peripheral arterial disease or have a history of previous foot disease<sup>4</sup>.

Diabetes related foot disease and chronic wounds represent a significant burden on the health care system. In recognition of this burden, the Department of Health and Aged Care in the 2023-24 Federal Budget awarded \$47.8 million over the next five years to fund new initiatives to improve access to better healthcare. The scheme is anticipated to be operational by 2025.

The Chronic Wound Consumables Scheme (CWCS) consists of a range of measures to improve outcomes for persons with a chronic wound and diabetes access to more affordable wound care. The CWCS aligns with the recommendations of the Strengthening Medicare Taskforce...

# A Guide to Disposable Gloves

In the market today there are a variety of disposable gloves to choose from, made from a diverse range of materials and production processes. Using natural or synthetic materials, disposable gloves are designed to suit a range of purposes, environments and user preferences. Here are some common types of disposable gloves that are found in medical and healthcare environments. Scan the QR code to read more about each type and their unique advantages.

# Shocktober

Is your finger on the pulse when it comes to defibrillators?

Each year, more than 30,000 Australians suffer cardiac arrest. If it happens outside a hospital, their chances of surviving are less than 1 in 103. In the United States, more than 350,000 cardiac arrests occur outside of a hospital setting every year.

Should cardiac arrest occur, death can result quickly if proper steps aren't taken immediately. When CPR and an AED are used in the first few minutes after a cardiac arrest, the chances of survival are the greatest.

# Community Care

1503448 Each  
\$99<sup>00</sup>

## Uccello Powered Kettle Tipper Black/White

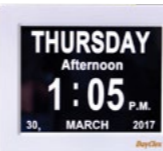

- Ideal for users with restricted strength and mobility
- Overheating protection
- Ergonomic handle
- Stainless steel heating element
- Effortless pouring technology
- Non-slip weighted base
- Water level indicator
- Power-on light

1292633 Each  
\$125<sup>00</sup>\*

## Shower Chair Plastic Adjust Height Standard 120kg Aluminium

- Seat Height Range: 390–540mm
- Overall Width (footprint): 590mm
- Overall Depth (footprint): 755mm
- Width between Armrests: 530mm
- Seat Width: 440mm
- Seat Depth: 405mm
- Backrest Height: 350mm
- Safe Working Load: 110kg

1499505 Each  
\$200<sup>00</sup>

## DayClox Easy to Read Digital Calendar

- Stand alone 8" Digital Calendar Clock – Wall Hanging or pull-out stand
- 8" LED Screen 203mm diagonal – 162mm wide x 122mm high
- Battery back up for power failures

1292641 Each  
\$129<sup>00</sup>\*

## Shower Chair Plastic Adjust Height Extra Wide Steel (125Kg)

- Seat Height Range: 420–570mm
- Overall Width (footprint): 645mm
- Overall Depth (footprint): 580mm
- Width between Armrests: 505mm
- Seat Width: 440mm
- Seat Depth: 405mm
- Backrest Height: 350mm
- Safe Working Load: 125kg

1504258 Each  
\$239<sup>00</sup>\*

## Freedom O/Toilet Aluminium Dignity Split Seat Chair

- Anti-slip suction rubber tips for enhanced stability
- Adjustable legs with precision adjustment pins ensuring maximum stability
- Oval-shaped tubing to prevent misalignment
- Powder-coated aluminum frame

1503456 Each  
\$719<sup>00</sup>\*

## Shower Chair Swivel Bather 445mm Seat Width 160kg SWL

- Rotating seat allows for easy transfer over the bath
- It can be removed instantly for normal bath use
- The chair attaches to most standard bath sizes
- Spacers are available to adjust bather height
- Locks in both the transfer and bathing positions
- No fixtures or fittings are required

1498738 Each  
\$149<sup>00</sup>\*

## Aluminium Shower Stool Aspire 465mm

- Provides a comfortable bathing experience
- Durable high grip feet
- Raised armrests
- Adjustable legs
- Width between the arms: 465 mm

## EquaGel Protector Cushion 2.5" Advanced Pressure

- EquaGel is a dry-polymer gel, it has unbelievable tensile and compression strength and incredible durability.
- 2 Layer Gel technology- top layer is a thin wall with tight grid for comfort, the bottom layer is thicker for deep posture support
- Grid design spreads & reduces pressure over a wider area
- Contoured pelvic area of the cushion for additional equalizing pressure distribution
- Black cushion cover is fluid resistant and vapour permeable
- 2.5" tall maintaining 1 3/4" gel below pressure points

# Debridement

Debridement is a medical procedure used to remove dead, damaged, or infected tissue from a wound to promote better healing. This process is essential in wound care as it helps eliminate tissue that can harbour bacteria, leading to infections and delayed healing. It is especially important for patients with chronic wounds, such as pressure ulcers, diabetic foot ulcers, or severe burns.

## Methods of debridement:

- Surgical debridement: Cutting away dead tissue using surgical tools.
- Autolytic debridement: Utilizing the body's natural enzymes and moisture to break down dead tissue.
- Enzymatic debridement: Applying topical agents that promote the breakdown of dead tissue.
- Mechanical debridement: Physically removing tissue using tools like dressings or irrigation.
- Biological debridement: Using organisms like maggots to consume necrotic tissue.

## Importance of debridement:

- Prevents infection: Dead tissue serves as a breeding ground for bacteria, which may lead to infections.
- Promotes healing: Removing necrotic tissue exposes healthy tissue, aiding the wound healing process.
- Reduces complications: Debridement can help prevent wounds from becoming chronic or leading to more severe medical issues.
- Improves wound assessment: Clearing away dead tissue enables healthcare professionals to better assess the wound's condition.

## Explore mechanical debridement from SSS Australia:

### Prontosan Debridement Pad

- Thorough wound cleaning, removing coatings and dead cell residues
- Effective cleansing and debridement with microfibre technology
- Unique droplet-shaped pads designed for shallow cavities
- Blister packaging enables safe and aseptic soaking
- Gentle on tissue, preventing irritation

1401106	P3	\$56 <sup>20</sup>
1513052	P10	\$185 <sup>00</sup>

### Cutimed Debriclean Sterile 9 x 13cm

- Efficiently sets the stage for wound healing
- The combination of gentle looped monofilament fibres and abrasive fibres absorbs bacteria and removed firm slough
- Suitable for any wound cleansing challenge

1447890	B5	\$89 <sup>00</sup>
---------	----	--------------------

### Debrisoft Monofilament Fibre Debridement Pad

- Removes debris rapidly, simply and effectively
- Gentle on newly formed granulation tissue and already established epithelial cells
- High patient acceptance as virtually painless to use
- Debrisoft removes up to 99.9%\* of biofilm

1436791	10 x 10cm	B5	\$114 <sup>00</sup>
1436783	13 x 20cm	B5	\$169 <sup>00</sup>

### Alprep Pad

- The open structure of the dark grey foam is for loosening The light grey softer foam is for absorbing and capturing
- Unique slits design increases the absorption and capture loosed slough, non-viable tissue and biofilms
- The special triangular shape makes for comfortable handling
- The packaging can also be used to wet and hold the pad

1502557	B5	\$119 <sup>00</sup> *

Biatain® Silicone Ag

# Wound Irrigation

Wound irrigation solutions are designed to clean and promote healing in wounds by removing contaminants, debris, and biofilm. Here's how they work:

- Cleaning the Wound:** These solutions often contain antimicrobial agents and surfactants. The antimicrobial component helps reduce bacterial load, while the surfactant lowers surface tension, aiding in the removal of dirt, necrotic tissue, and biofilm (a protective layer formed by bacteria on the wound surface).
- Preventing Infection:** The antimicrobial properties help prevent or manage wound infections by creating an environment that reduces bacterial growth. This is particularly useful for chronic wounds or those at risk of infection.
- Promoting Healing:** By cleaning the wound and removing biofilm, which can delay healing, the solution helps optimize conditions for tissue repair, allowing new tissue to form more effectively.
- Reducing Inflammation:** These solutions can also reduce inflammation caused by debris, bacteria, and biofilm in the wound bed.

### Prontosan Wound Irrigation Solution

- Reduces healing time
- Removes and prevents the formation of biofilm
- Prevents infections
- Facilitates gentle dressing replacements

## Baxter Welch Allyn Connex SPOT MONITOR

### W.A. Connex Spot Vital Signs Monitor NIBP/Nonin SpO2/Pro6000

Keep track of a patient's vital signs with the Connex Spot Monitor from Welch Allyn. This device is intuitive to use with a crystal-clear touchscreen and comes with a range of wall mounting and mobility stand options. The

Welch Allyn Connex Spot Monitor provides the tools to accurately measure non-invasive blood pressure (NIBP), oxygen saturation levels (SpO2), pulse rate and patient temperature.

Featuring wireless connectivity that connects to over 90 Electronic Medical Records (EMR) systems to improve efficiency by instantly adding information to a patient's chart (wireless connectivity needs to be enabled through the setup configuration). The Welch Allyn Vital Signs Monitor is designed to be upgradable, with the capability to update the thermometer and pulse oximeter units. The mobile work stand (MWS) uses WhisperDrive™ technology that provides additional power reserves to enable the monitor to run continuously for up to 17 hours.

The Connex Vital Signs Monitor takes a snapshot of a patient's well-being. It can confirm a diagnosis or prevent a misdiagnosis, assist with detecting underlying health conditions, aid in the reduction of manual errors and help identify symptomless medical conditions.

- Blood pressure readings in 15 seconds using the SureBP®
- Correct hypertension diagnosis using blood pressure averaging
- SureTemp® Plus Oral / Axillary or Braun ThermoScan® PRO 6000 Tympanic Thermometry
- Options for WiFi®, Ethernet and Bluetooth® connectivity to EMR systems
- Multiple mounting options with mobile stands and wall mounts to suit specific work environments
- Single sign-on options - including integration with Imprivata - available for quick, secure clinician login
- Automated Early Warning Scoring to assist clinicians identify and respond to signs of patient deterioration (ie. MEWS, NEWS)
- Options to use the leading SpO2 systems from Masimo®, Nellcor® or Nonin®
- Connectivity to Detecto, Health o meter® and SECA scales
- Secure FIPS-approved encryption of transmitted data and a range of additional security features
- Personalised work processes for recording patient observations and vitals options (ie. BP cuff location)
- Three-year warranty

# BodyGuard T Syringe Pump

BD BodyGuard T Syringe Pump

1453157 Each \$3,499<sup>00</sup>\*

The BD BodyGuard T Syringe Pump is a medical device used to administer precise and controlled amounts of fluids, medications, or nutrients to patients intravenously, subcutaneously, or epidurally. The BD BodyGuard T Syringe Driver consists of a syringe holder that accommodates various sizes of syringes and a mechanism that slowly pushes the plunger of the syringe to deliver the desired amount of liquid at a controlled rate.

The BD BodyGuard syringe pump is programmable, allowing healthcare providers to set specific infusion rates and dosage parameters, ensuring accurate and steady delivery of medications or fluids over a specified period. Syringe pumps are commonly employed in hospitals, clinics, and home care where precise drug administration and fluid management are crucial.

- Flow rate is adjustable from 0.1 ml/h to 650 ml/h
- KVO Operation Rate: 0 ml/h (OFF)–5.0 ml/h with ±5%\* flow rate accuracy
- Bolus flow rate ranges from 1 to 650 ml/h
- Bolus volume increments 0.1 ml for 0 to 20 ml
- Programmable infusion time is 1 minute up to 99 hours
- Compatible with 2 ml to 50 ml syringes from major manufacturers
- Adjustable occlusion pressure setting between 200 and 1500 mmHg
- Post Occlusion Bolus Reduction System (POBRS)
- Approximate battery life is about 25 or 20 hours

# Prevalence and Complications of Female Urinary Incontinence

## Prevalence of Female Urinary Incontinence

Urinary incontinence (UI) is a significant health issue for women in Australia. Up to 38% of Australian women experience urinary incontinence, which requires regular use of incontinence products and medical interventions. This condition is particularly prevalent among older women, with studies showing that nearly half of women over 70 years old suffer from UI. Moreover, women who have had multiple pregnancies or have undergone pelvic surgeries are at higher risk of developing incontinence.

## Complications Associated with Managing Moderate and Severe Female Urinary Incontinence

Managing moderate to severe UI in women involves a range of complications that can significantly impact physical health, psychological well-being, and social life. Common complications associated with moderate to severe UI in women include:

- Skin Problems
- Urinary Tract Infections (UTIs)
- Anxiety and Depression
- Sleep Disturbances

## PureWick™ Urine Collection System

The PureWick system is a comfortable and easy-to-use device to help manage incontinence in aged care facilities and at home. Innovative and non-invasive, the PureWick System utilises a soft and flexible wick that uses suction to draw away urine leaving the surrounding skin dry. The liquid is pumped into a sealed container that is easy to empty and clean.

Why you'll love the BD PureWick™ Urine Collection System:

- It can be used 8-12 hours at a time
- The external wick (catheter) works outside the body to draw the liquid quickly away
- The catheter wick is made from flexible and soft material
- The system can be used in inclined seated or lying down positions
- The compact canister fits easily onto bedside tables
- Urine is stored and sealed in the collection canister
- The device is easy to set up and to clean
- Can be used on mains or with battery power

Helps keep skin dry by wicking away urine.

Can make better sleep possible.

May help to reduce the need to use bathroom at night.
